

**WE UNDERSTAND**

# FROZEN PRODUCE

## FROZEN PRODUCE STORAGE

Maintaining the cold chain for frozen produce is necessary to ensure flavor, texture, and color. Frozen produce processors come to FlexCold to store their products for our food safety, quality standards, and ease of doing business.

Our highly modern technology and equipment ensure efficient operational processes and inventory handling. Our mobile racking system provides faster, more accurate operations and decreases pallet touches and inventory damage. And the need to pick individual items and build mixed pallets is made possible with our sophisticated warehouse management system.
